Bac S (French Science Leaving Certificate) in Rouen

HOBIES

PASSIONATE

Passionate about music, I created the YouTube Channel "Syl's Music Room" in 2017.

A new video is released each month, where I play different instruments and do home studio recording.

I also like to use my professional skills in design, web and communication to voluntarily help French or Irish bands or artists.

AMBITIOUS

Quick learner and self-motivated, I used to do online webdesign and programming courses, on websites such as Pluralsight.com and SoloLearn.

In addition, I participated to several game jams (video game development contests in limited time) organised by and with pro and amateur developers.

I took part in the 39th edition of the Ludum Daree; an important international game jam orgnised by American professional developers. For most of my creations for the game jams, I have used C# (some of these are in my portfolio).

CURIOUS

French expat in Ireland, I like to discover new cultures and travel abroad. I have already visited 11 countries.

Beside, I also really enjoy working with people from different countries in my professional career.
